

# PS 6048

## HAVARIEVERSTÄRKERUMSCHALTUNG FÜR LT 2708

### BESCHREIBUNG

PS 6048 is a power supply unit suitable to get continuity power for EN 54-16 systems units like DXT 9000 and DXT 7000, and relevant complementary devices in case of mains power supply interruptions. It includes recharging and monitoring functions for the lead-acid batteries connected to it. It must be equipped with batteries with suitable capacity, dimensioned according to the system power absorption and to the evacuation requirements. According to EN 54-16 standard, PS 6048 shall be installed into the same rack cabinet where there is the audio system with emergency purposes (or a system part) to which it is connected

### FUNKTIONEN

- Permanent and emergency power for installations
- Performance and reliability for guaranteed power
- Continuity of service of your installation through real time monitoring of system status
- Control of the battery and its circuit: protection, management, self-diagnostic
- Quick and easy installation and user-friendly operation
- No preventive maintenance: continuous monitoring of the emergency power supply with local display and remote reporting
