

BT BOARD DMA

OPTIONAL BLUETOOTH BOARD

DESCRIPTION

The BT BOARD is an additional board that allows to connect a DMA amplifier to a mobile device using Bluetooth technology. This makes possible to send audio from the mobile device to the amplifier and at the same time control it, in terms of levels and equalization of inputs and outputs. To control the amplifiers, an Android and iOS app is available for download.

FEATURES

- Installation inside DMA units
- No additional power supply required
- Up to 4 pairable devices
- Audio streaming and control via mobile app
- Bluetooth 5.0. technology
- Control app available for both Android and iOS devices.
