

# MG 3006

## MONITORED GPI BOARD

### DESCRIPTION

MG 3006 is an additional board for DXT 3000 master units. It allows monitoring system's General Purpose Inputs (GPI), detecting and reporting open line faults or short circuits along the path between DXT 3000 and other emergency devices, such as alarm buttons. It shall be installed inside the master unit, and powered directly by the system.

### FEATURES

- Faults detection and reporting
- General and zone alarm activation
- Reset function
- Powered by master unit
