ACCESSORIES

A&E SPECIFICATIONS

The product shall be a multipurpose two-way bass-reflex speaker, suitable for a wide range of applications, providing a balanced sound in near-field applications.

It shall be suitable for broadcasting background music into commercial spaces, but also alarm messages, thanks to the highly intelligible voice reproduction and the EN 54-24 certification.

Its design shall be elegant and compact with accurate finishing, suitable for almost any environment, even with architectural constraints.

It shall be equipped with a 5" woofer and a 1" dome tweeter and shall include an internal transformer (with a power selector on the rear side) that allows the connection to 70 / 100 V constant voltage lines.

The terminal connection blocks, for input and output flameproof cables, shall be made of ceramic material. A thermal fuse shall protect the line integrity in case of heat affecting the speaker.

NOTES

NO CAUTION is NECESSARY in case of ALERTED PERSON for AUDIO voltages up to 120V, when warning symbols are present near the connection terminals. In the case of AUDIO voltages up to 71V, it is not even necessary to put warning symbols.

No need of linking to earth metal parts of speakers equipped with transformers and connected to 70.7 V / 100 V outputs of power amplifiers that do not have any reference to earth (ref. EN 62368-1 item 4.3.2.2), unless specific local requirements.
